CURRICULUM VITAE

Mohit ARORA
Full Stack Web Developer

As a full stack web developer, I have knowledge and skills to build a dynamic end-to-end web application. With health background, I have been utilising this new knowledge and skills in developing research project websites and disseminating the research findings to a broad range of stakeholders. In addition, working with a team of experts to develop a digital solution for a useful health-related educational resource for people with neurological disorders.

TOP FOUR PROJECTS

Project 1: Password Genie

- *Description*: A simple, secure and responsive application that allows users to generate an store passwords for their every registered account. As a busy professional who manages many systems with different password requirements, I want a simple and secure Password Management System that allows me to generate and store different passwords, so that I can access them when required for every registered account.

- *Technologies/Packages used*:
    1. HTML
    2. CSS
    3. JavaScript
    4. Moment js
    5. Bootstrap
    6. bcrypt
    7. connect-session-sequelize
    8. cryptr
    9. dotenv
    10. express
    11. express-handlebars
    12. express-session
    13. generate-password
    14. handlebars
    15. mysql2
    16. sequelize
    17. shield-io
- *Heroku deployed link*: https://password-genie.herokuapp.com/login

Project 2: Bootcamp Hub

- *Description*: As a bootcamp student with access to Bootcamp Hub website. I want to access a useful website that meets criteria for different skills, where I can access updated date, time and weather report and apply for upcoming job ventures. In addition, supplying me with useful resources and providing me with quick link access to them if needed. As well as allowing me to develop a personal to-do-list in order to keep on track and on top of my work and opportunity to access other fun activities such as games and/or cheats I find to be beneficial to my learning. So, I can stay organised with my work, progressing me further with my course and helping me stay on track to becoming successful.
- *Technology used*:
    1. HTML
    2. CSS
    3. JavaScript
    4. Moment js
    5. Bootstrap
    6. Weather API
    7. Inspiration Quote API
- *Deployed link*: https://marora7926.github.io/bootcamp-hub/

Project 3: Code Quiz
- *Description*: This piece of work enhances my skills to build a timed coding quiz with multiple-choice questions. This app will run in the browser and will feature dynamically updated HTML and CSS powered by JavaScript code that are included. It has a clean, polished, and responsive user interface. As a coding boot camp student, I wanted to take a timed quiz on HTML, CSS and JavaScript that stores high scores, so that I can gauge my progress compared to my peers.
- *Technology used*:
  1. HTML
  2. CSS
  3. JavaScript
- *Deployed link*: https://marora7926.github.io/code-quiz/

Project 4: Work-day Scheduler
- *Description*: AS AN employee with a busy schedule, I wanted to add important events to a daily planner, so that I can manage my time effectively.
- *Technology used*:
  1. HTML
  2. CSS
  3. JavaScript
- *Deployed link*: https://marora7926.github.io/work-day-scheduler/
